

**Remote Backup Service Package Plans**

[www.drbackup.net](http://www.drbackup.net)

If for any reason you are not absolutely delighted with the ease-of-use, safety or convenience of our service -- please let us know immediately. We will either fix the issue or refund 100 percent of your monthly service fee.

All packages include Microsoft Windows®-compatible backup software for use on one (1) PC, laptop or server. Licensed users can perform an unlimited number of backups and restorations using an existing Internet connection. While each Windows device must have its own license, disk storage is 'pooled' across all sub-accounts in the selected plan. Custom quotes are available for larger installations.
